QUESTION 1

Part A

Deloitte comment letter on amendments to the classification and measurement of financial instruments
Published on: 19 July 2023

"We support amendments proposed to IFRS 9 to explicitly permit the derecognition of financial liabilities at the date of the instruction to remit cash under an electronic payment system if certain criteria are met. However, we believe that the requirement to assess whether the paying entity has the right to cancel the instruction is not necessary and is unduly onerous. We believe that the other criteria proposed in the Exposure Draft (ED) would be sufficient to support the assessment for derecognition of the financial liability at the date of the payment instruction".
